

Security Effectiveness Assessment

Increase corporate value with appropriate security investment and responses to the latest threats

Security effectiveness assessment contributes to corporate value. It delivers effective cybersecurity to keep business sustainable, while also improving your corporate defense capabilities with effective IT investment.

Global Corporate Security Statistics and Issues Confronting Corporations

Cost-effectiveness is difficult to measure in cybersecurity. It may take several months to grasp the effectiveness of a regular cybersecurity test. By contrast, it only takes a few hours for ABeam's security test service to allow you to assess its cost-effectiveness under comparative evaluation.

Global security investment by corporations

*Compiled by ABeam Consulting based on Gartner, "Forecast: Information Security and Risk Management, Worldwide, 2016-2022, 3Q18 Update", 19 November 2018

The majority of companies are not effectively utilizing **80%** of their implemented solutions.

15% of vulnerabilities are due to improper security solution settings.

Many solutions do not block **54%** of emails which include ransomware.

In **60%** of cases, the attacker infiltrates the company in 1 minute.

66% of companies do not recover from a cyber attack.

Overview of Service

Attackers infiltrate companies via email or web browsing. Traditional penetration tests may take several months. By contrast, we perform black box, multi-vector assessments within a few hours, producing accurate reports and suggestions to remediate issues by leveraging Cymulate's Breach & Attack Simulation platform.

*1 Vector indicates a unit of assessment. Assessment menu can be selected in Vector units.
