

ABeam Cloud[®] Conversion Express Factory for SAP S/4HANA[®]

For Digital Native Era, ABeam Cloud[®] assists Innovative Platform Conversion

For Digital Native Era, ABeam Cloud[®] assists Innovative Platform Conversion

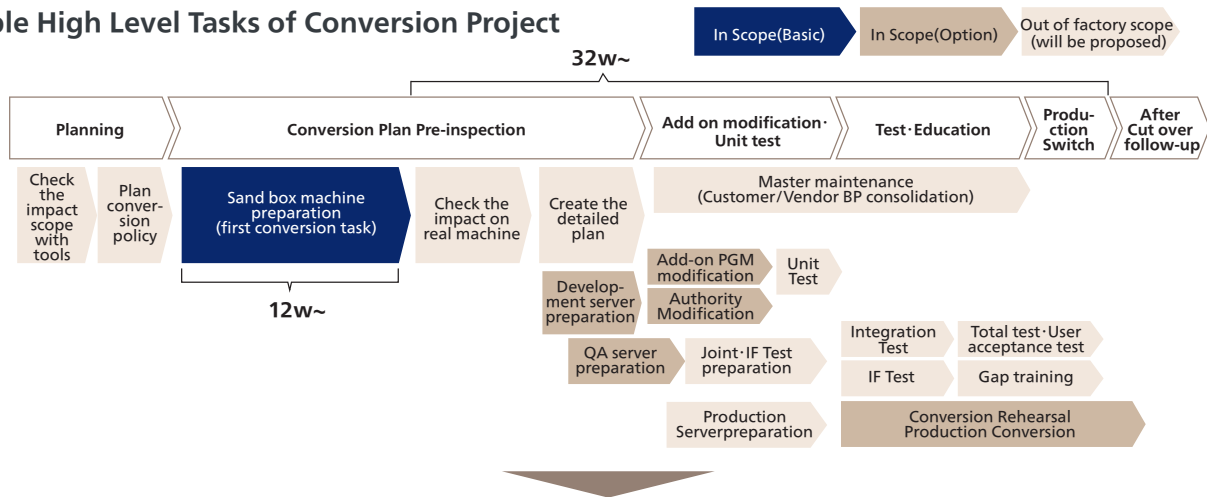

Preparing for the advance of digitalization, the innovation that aggressively introduce digital technology is required to business with enterprise system. Software vendors publishing the 'roadmaps' that incorporate A.I automatic process to each functions. And we presume that this functions will be expanded from now on. Accordingly, if the system migrated to S/4HANA[®] in early phase and utilize it as digital core, you can prepare for these innovative flow stepwise & freshly.

Why Factory Service Required?

Usually, a sand box environment is prepared for SAP S/4HANA[®] conversions, and conversions are conducted for development, QA, and production server after establishing basic procedures and confirming the scope of impacts. Those tasks include many relatively simple but high-volume tasks. So assigning dedicated resource for each project is not always effective.

Sample High Level Tasks of Conversion Project

Need to repeat cumbersome but simple tasks. Not efficient to assign dedicated SAP consultants at high price.

ABeam Cloud[®] Conversion Express Factory for SAP S/4HANA approach

ABeam Cloud[®] Conversion Express Factory for SAP S/4HANA[®] is package solution for supporting phased conversions from ECC system to SAP S/4HANA[®] quickly with lower effort.

Express Factory is the quick, low-cost, and high quality service for high volume customization and data conversion tasks required for SAP S/4HANA[®] conversion with our standardized approach.

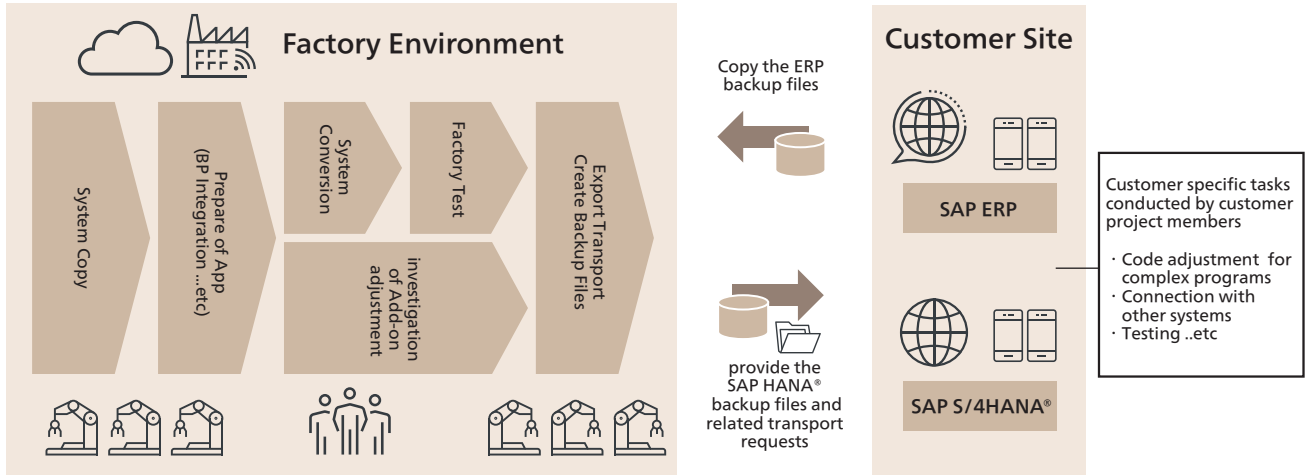

Dedicated Team	Standardized	Cloud · Off shore Use	Value Add
SAP S/4HANA [®] conversion by specialists.	Taking advantage of our expertise and standardization approach, conversion is processed efficiently and with high quality.	Quick and low cost service by using cloud · off shore resource.	As option, setup for additional functions and integration with other SaaS are available as well.

How We Make Your SAP S/4HANA® Conversion Simple and Extendable

Express Factory is specialized in the area like commonly installed modules and simple code replacement, that standardization/mass-production is effective. Express Factory Service enables less human resource required for conversion and add-on modification and shorter project period.

* First sandbox creation will be completed in 3 months at the earliest. (It depends on the condition of conversion environment etc.)
