

# Starter Pack for SAP Integrated Business Planning (Food and Beverage Industry)

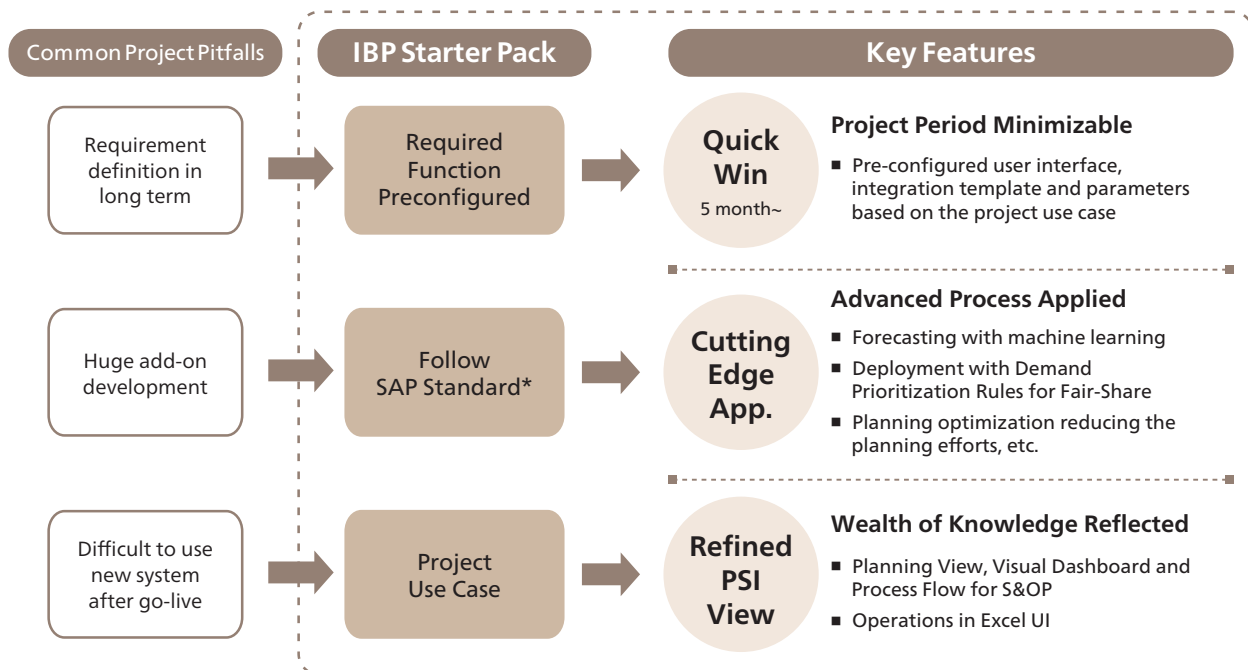

Take your business to the next level with Quick Win, cutting-edge app and refined PSI view

## Current challenges confronting the Food and Beverage industry

Food and Beverage companies face an urgent need to achieve sustainable consumption and production patterns by reducing food loss as specified under sustainable development goals (SDGs), and to increase cash flow through inventory reduction and specific lot control. At the same time, they are also under pressure to maximize profits. The critical issue this entails for Food and Beverage companies is how to equip themselves with supply chain management that better enables them to deal with the supply chain itself. This must be accomplished along with sales & operation planning (S&OP) under IT systems that tend to be very complex to grapple with, often necessitating a prolonged project period before go-live.

## IBP Starter Pack key features

IBP Starter Pack is a solution whereby integrated business planning process for Food and Beverage companies can resolve their issues and get a quick win.

\* ABeam supports use of new functions to align with the IBP upgrade provided by SAP every three months.

## Value proposition of ABeam Consulting

ABeam Consulting has specialists with rich experience in the Food and Beverage Industry and global business process standardization, as well as global system implementation.

IBP Expert

Certified global top-level IBP consultants and experts work for ABeam, bringing to bear extensive knowledge of the food and beverage industry.

Best Practice

Based on our best practice, ABeam provides standardized and streamlined business processes from local to global. With our data analysis capabilities, ABeam can support optimization of the required parameters when customers move forward with supply chain planning.

Methodology

ABeam provides the best solution by tracking each category of progress and system quality with the original methodology defined under ABeam Method®, the project management method of ABeam Consulting.

## Why ABeam Consulting's IBP Starter Pack?

ABeam Consulting provides the IBP Starter Pack for global business process standardization.

### Preconfigured ABeam Consulting templates

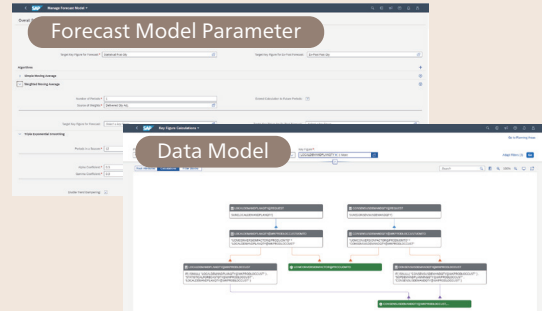

#### User Interface Template

- Industry-specific and easy-to-see UI layout to maintain Excel efficiency.

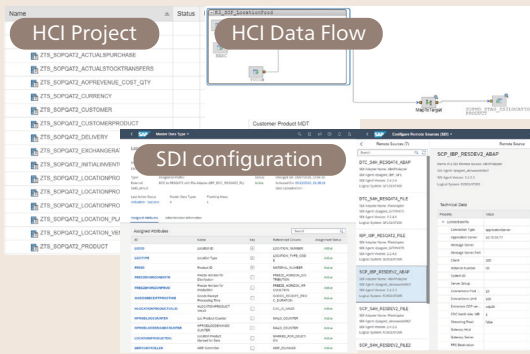

#### Parameter Template

- Optimal parameters based on actual past projects for fast and accurate planning.

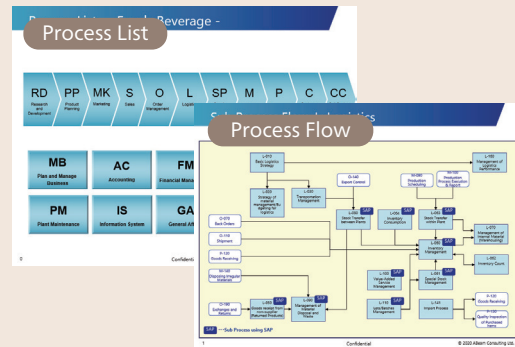

#### Integration Template

- Data integration template of ECC and S/4HANA for reliable data transfer.

#### Business Process Template

- Industry specific process for preventing omission of business requirements.

## ABeam Consulting's approach to implementation

Minimum 5 months to go-live with IBP starter pack.

### Approximate cost

- Consulting service fee starts from 70M Japanese yen for IBP starter pack implementation.
- The above fee doesn't include the cost of IBP upgrade in every 3 month, modification of IBP starter pack, and any AMO services after go-live.

### Client prerequisites

- The following SAP-IBP licenses are required:
  - IBP for S&OP, Control Tower, IBP for Demand, IBP for Response & Supply and JAM
  - 1 SAP-IBP test tenant
  - 1 SAP-IBP production tenant
- Installation server required for HCI and SDI data integration.
- The following are the minimum versions of SP required for SAP-ECC or SAP S/4 HANA. If the client prefers to keep an older SP version, additional IF program development will be required.
  - SAP\_BASIS: SAPKB73110
  - SAP\_APPL: SAPKH60610
