

## JERA-DPP®

Maximization of "life cycle value", Quick and accurate equipment diagnosis

### Digital Power Plant(DPP) Package

DPP Package is a solution that enables power plant operations that maximize life cycle value.

DPP Package connects equipment data and human data to provide real-time visualization of the power plant status and lifecycle performance.

### Global Data Analyzing Center(G-DAC)

G-DAC provides remote monitoring services 24 hours for operating status of power plants, analyzing data, and technical supports based on data analysts utilizing developed AI technological tools.
