Enact

# Enact

*Realtime integration and analytics for short-term power markets*

**Enact is a cutting-edge data integration and analytics platform designed for the GB and European short-term power markets.**

It empowers traders and analysts with data-driven insights to enhance decision-making, through customisable interfaces, intelligent querying, real time alerting and live AI-powered forecasts of renewable generation, imbalance and prices.

## Enact aims to:

- Allow traders to make better, more informed decisions
- Allow analysts to easily spot historical trends through vast amounts of data
- Enable the development of algorithmic models for power market analysis and to support renewable deployment

*Rajiv Gogna*

Partner

## Disclaimer and use of our work

Where this report contains projections, these are based on assumptions that are subject to uncertainties and contingencies. Because of the subjective judgements and inherent uncertainties of projections, and because events frequently do not occur as expected, there can be no assurance that the projections contained in this report will be realised and actual events may be difference from projected results. The projections supplied are not to be regarded as firm predictions of the future, but rather as illustrations of what might happen. Parties are advised to base their actions on an awareness of the range of such projections, and to note that the range necessarily broadens in the latter years of the projections.
