

ABeam Cloud® Conversion Express Factory for SAP S/4HANA®

For Digital Native Era, ABeam Cloud® assists Innovative Platform Conversion

Why do you need S/4HANA Conversion now?

As part of digital transformation journey, changes are inevitable especially for mission-critical systems throughout the organization. Early adoption of S/4HANA as the digital core enable the organization to be well prepared to embark on the journey. This is aligned with the RISE with SAP strategy of realizing Intelligent Enterprise, such as centralized data management, real-time data-driven processes, as well as utilization of artificial intelligence and machine learning.

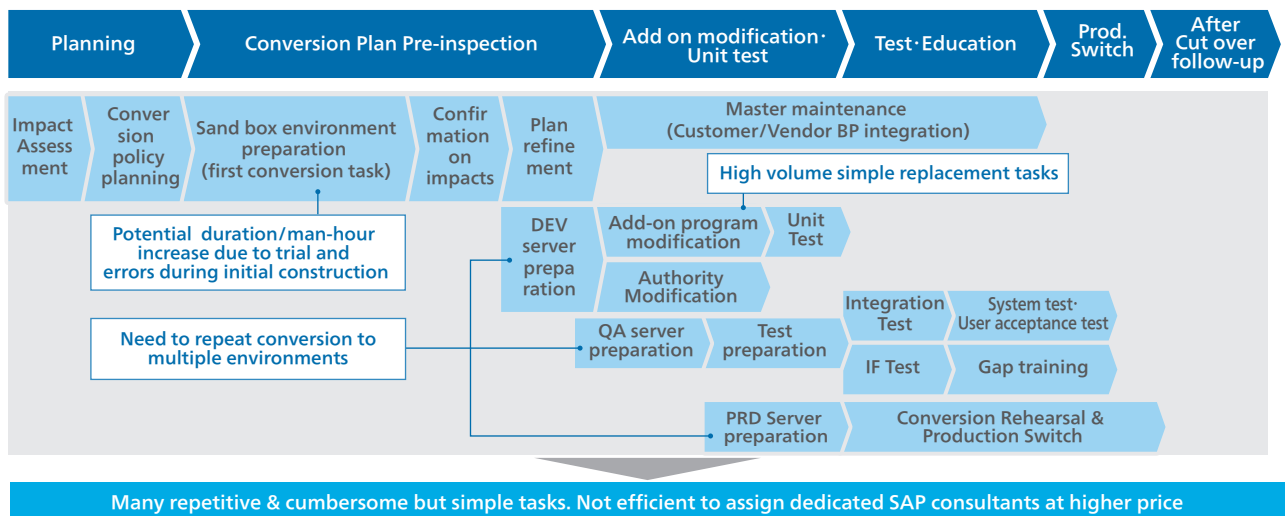

S/4HANA Business Transition Forecast (Number of Projects | Operation Time Based)

Why Conversion Express Factory?

In a typical S/4HANA conversion, a sandbox or temporary environment is prepared to establish basic conversion procedures and to confirm the scope of impacts before the conversions for Development, Quality and Production environment are conducted. Assigning dedicated resources for each conversion project is not always efficient and cost-effective for these relatively simple but high-volume tasks.

Sample High Level Tasks of Conversion Project

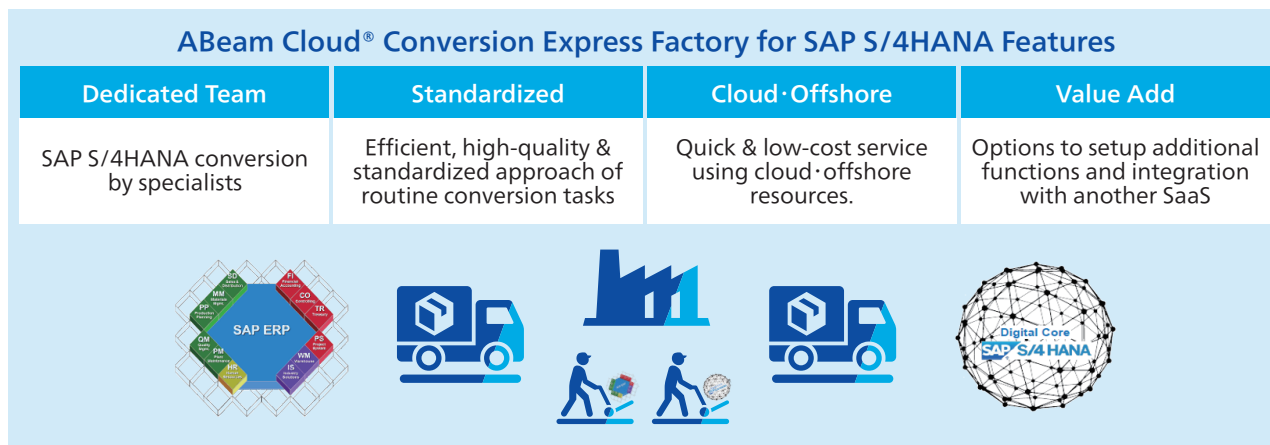

ABeam Cloud® Conversion Express Factory for SAP S/4HANA®

ABeam Cloud® Conversion Express Factory for SAP S/4HANA® is a packaged solution, supporting phased conversion from SAP ERP system to SAP S/4HANA®. Using our standardized approach, Express Factory is a quick, low-cost and high-quality service for high volume customization and data conversion tasks required for SAP S/4HANA® conversion.

How we make your SAP S/4HANA® Conversion simple and extendable

Express Factory specialized in the standard SAP ERP modules and simple code replacement, where conversion can be executed similar to factory mass-production. This enables other project resources to concentrate on a complex add-on modifications conversion, resulting in a shorter total project duration.

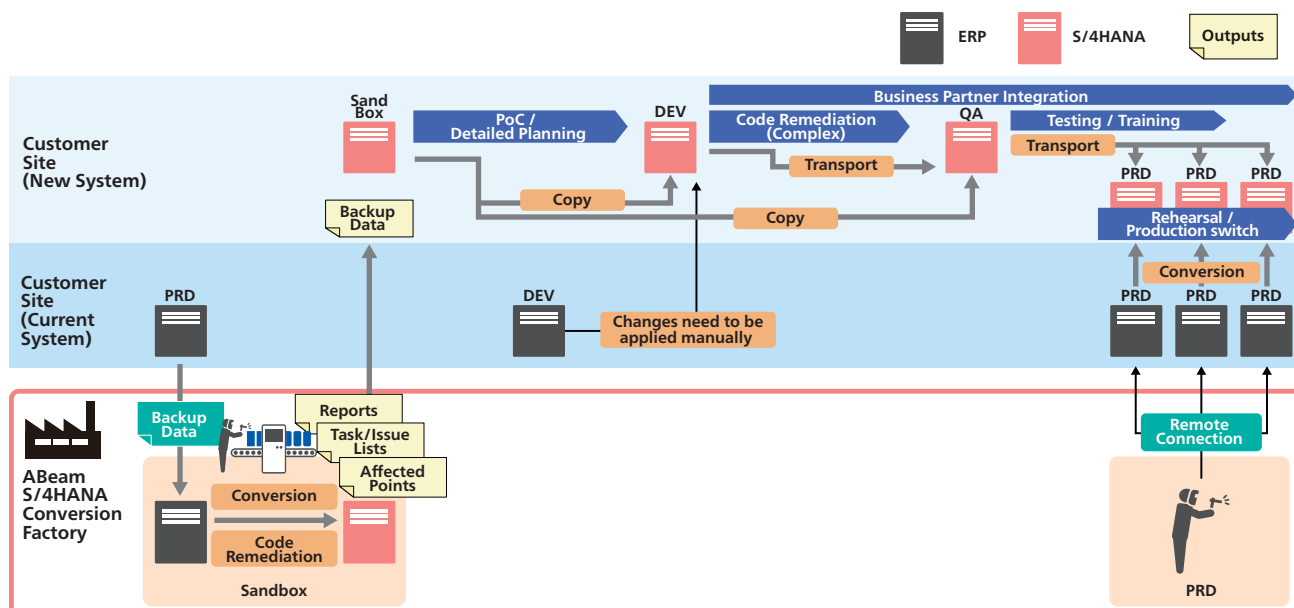

* First S/4HANA sandbox creation can be completed in 8 weeks on average.

ERP environment of each customer differs in module, version, patch level and customized contents, hence our Express factory team will be combined with project specific resources (for customer specific requirements) for the total completion of the conversion project.
